SECTION 01

Product Overview & Goals

This PRD defines the complete requirements for a premium, public-facing portfolio web application built for an independent Roblox game developer. The platform serves as a living showcase of work, a client acquisition tool, and a professional services hub — all in one polished experience.

Primary Goals

- Showcase Roblox games, assets, and development work with rich media and descriptions.
- Enable prospective clients to explore the portfolio, understand capabilities, and make contact.
- Accept service bookings and upfront payments directly from the site.
- Maintain a professional, distinctive brand identity that stands out from generic portfolio sites.
- Allow the owner to manage all content (projects, images, descriptions) without developer help.

Product Name	Antigravity Studio — Portfolio Web App
Version	2.0
Owner / Operator	Roblox Game Developer (sole operator)
Primary Audience	Game studios, indie developers, content creators, brands seeking Roblox experiences
Launch Target	Q3 2026
Platform	Web — desktop & mobile responsive
Confidentiality	Internal — Confidential

SECTION 02

Target Users & Roles

Role	Description & Permissions
Visitor (Public)	Anyone browsing the portfolio. Can view all public projects, read descriptions, view images/videos, and use the contact form.
Prospective Client	A visitor with intent to hire. Can book discovery calls, submit project briefs, and pay deposits via the payment system.
Portfolio Owner (Admin)	The developer/studio owner. Full CMS access: upload projects, edit descriptions, manage images, set pricing, view inquiries, and configure all site settings.
Collaborator (v2)	A secondary developer added by the owner. Can upload their own work under a sub-profile linked to the main portfolio.

SECTION 03

Site Architecture & Pages

The site is structured as a single-domain web app with six core public-facing pages and a password-protected admin dashboard.

Page	Description
Home / Hero	Animated landing section, headline, featured projects carousel, CTA buttons (View Work, Hire Me).
Portfolio Gallery	Filterable grid of all projects. Filter by: Game Type, Status, Tech Stack. Each card shows cover image, title, short description, and a 'View Project' link.
Project Detail Page	Full project page: hero image/video, title, full description, tech stack badges, screenshots gallery, links (Roblox game, GitHub), and related projects.
About	Developer bio, skills & tools, timeline of experience, photo/avatar, and downloadable CV/resume option.
Contact	Inquiry form (name, email, project type, budget range, message). Auto-reply confirmation email. Admin notification.
Hire Me / Services	Service packages with descriptions and pricing. Booking calendar (Calendly embed). Stripe payment for deposit. Project brief submission form.
Admin Dashboard	Private CMS: add/edit/delete projects, upload images, edit descriptions, view inquiries, manage bookings, site settings.

SECTION 04

Portfolio Upload & Image Management

A robust image and media management system is core to this portfolio. The admin must be able to upload, organise, reorder, and delete all visual assets without technical knowledge.

Upload Requirements

- Drag-and-drop image uploader on the admin dashboard (no coding required).
- Supported formats: JPG, PNG, WebP, GIF (static), MP4 (video preview clips up to 60s).
- Maximum file size: 20 MB per image, 200 MB per video.
- Bulk upload: upload up to 20 files at once per project.
- Automatic image optimisation and WebP conversion on upload.
- Per-project image gallery: reorder images via drag-and-drop; set a 'cover image' used as the card thumbnail.
- Alt-text field for each image (accessibility + SEO).
- Images stored on cloud CDN (e.g. Cloudinary or AWS S3) — not the app server.

Image Display Behaviour

Context	Behaviour
Portfolio Grid Card	Cover image displayed as a 16:9 cropped thumbnail. Hover reveals project title overlay.
Project Detail — Hero	Full-width hero image or autoplaying muted video loop.
Project Detail — Gallery	Lightbox carousel showing all uploaded images. Click to expand, arrow-key navigation.
About Page	Developer avatar/photo upload (square crop, min 400×400 px).
Home Page Carousel	Owner selects up to 6 'featured' projects shown in a scrolling hero carousel.

SECTION 05

Portfolio Descriptions & Project Detail

Each project in the portfolio must have a rich, structured description that communicates the work done, the technologies used, and the impact or outcome — not just a title and screenshot.

Project Entry Fields

Field	Type	Required	Notes
Project Title	Text (80 char max)	Yes	Shown on card and detail page.
Short Description	Text (160 char max)	Yes	Used on portfolio grid cards and meta description.
Full Description	Rich text (WYSIWYG)	Yes	Full project story: role, challenges, solutions, outcome. Supports bold, lists, links, headings.
Cover Image	Image upload	Yes	Primary thumbnail. Auto-cropped to 16:9.
Gallery Images	Multi-image upload	No	Up to 20 additional screenshots/artwork.
Video Preview	MP4 / YouTube URL	No	Autoplays muted on detail page hero.
Tech Stack / Tools	Tag selector	Yes	e.g. Roblox Studio, Lua, Blender, Figma.
Game Type / Category	Dropdown	Yes	e.g. RPG, Simulator, Obby, Tycoon, FPS.
Project Status	Dropdown	Yes	Live / In Development / Archived.
Roblox Game Link	URL field	No	Direct link to the Roblox game page.
GitHub / Source Link	URL field	No	For open-source or sample projects.
Featured Project	Toggle	Yes	If on, included in homepage carousel.
Publish Date	Date picker	Yes	Shown on project page.
Client Name	Text	No	Optional. Shown as 'Built for [Client]'.

SECTION 06

Contact & Inquiry System

The contact system allows potential clients to reach the portfolio owner directly from the site. All submissions are stored in the admin dashboard and trigger an email notification.

Contact Form Fields

Field	Type	Required
Full Name	Text input	Yes
Email Address	Email input (validated)	Yes
Company / Studio Name	Text input	No
Project Type	Dropdown (Game Dev / Asset Design / Consulting / Other)	Yes
Estimated Budget	Dropdown range (\$500–\$1k / \$1k–\$5k / \$5k+ / TBD)	No
Project Description / Message	Textarea (2000 char max)	Yes
How did you find me?	Dropdown (Twitter / Roblox / Google / Referral / Other)	No
Spam protection	Google reCAPTCHA v3 (invisible)	Yes

Email Notifications

- On submission: auto-reply sent to the visitor confirming receipt and stating typical response time (48h).
- Admin notification email sent to the owner's inbox with full submission details.
- All submissions stored in the Admin Dashboard under 'Inquiries' with read/unread status.
- Owner can reply directly from the dashboard (sends from a no-reply address) or click 'Reply via Email'.
- Spam filtering: submissions flagged by reCAPTCHA score < 0.5 are quarantined, not deleted.

SECTION 07

Payment & Booking Integration

The 'Hire Me / Services' page enables direct monetisation of the portfolio. Clients can browse service packages, book a discovery call, and pay a project deposit — all without leaving the site.

Service Packages (Admin-Configurable)

Package	Example Scope	Deposit
Discovery Call	30-min consultation. No charge or nominal fee.	\$0 – \$25
Game Design Consultation	2h session, written brief output.	\$50 – \$100
Asset / Script Package	Defined deliverable, agreed timeline.	25–50% upfront
Full Game Development	Full project, milestone-based.	30–50% upfront
Custom (Enquiry Only)	Large or unique projects — quote on request.	TBD

Payment & Booking Requirements

- Stripe integration for secure online payments. Supports card, Apple Pay, Google Pay.
- Owner sets deposit percentage or fixed amount per service package in the admin dashboard.
- Payment confirmation page shown post-checkout. Confirmation email sent to client with receipt.
- Calendly embed on the booking page for discovery call scheduling. Syncs with owner's calendar.
- Optional: project brief form submitted alongside payment (name, email, project details).
- Stripe Dashboard used by owner to manage payouts, refunds, and payment history (not built into the app).
- Currency: USD default. Owner can set preferred display currency in settings.
- Legal: Stripe handles PCI compliance. Site displays Terms of Service and Refund Policy pages.

Feature Specifications

Must-Have (v1 Launch)

Feature	Description
Portfolio Gallery	Filterable project grid with cover images, titles, short descriptions, and status badges.
Project Detail Pages	Full rich-text description, image gallery (lightbox), video, tech tags, external links.
Image Upload & Management	Multi-image upload, reorder, cover image set, cloud CDN storage, alt text.
Contact Form	Validated form, reCAPTCHA, admin email notification, auto-reply, dashboard inbox.
Services / Hire Me Page	Service packages with pricing, Calendly booking embed.
Stripe Payment	Upfront deposit payments for services. Confirmation email + receipt.
Admin Dashboard / CMS	Full content management: projects, images, services, inquiries, settings.
Responsive Design	Fully functional and polished on mobile, tablet, and desktop.
SEO Basics	Meta titles/descriptions, Open Graph tags, sitemap.xml, robots.txt.
About Page	Bio, skills, tools, timeline, downloadable CV option.
Performance	Core Web Vitals: LCP < 2.5s, CLS < 0.1. Images lazy-loaded and optimised.
Dark / Light Mode	System-preference aware; manual toggle available.

Technical Requirements

Area	Requirement / Stack Suggestion
Frontend	Next.js (React) — SSR for SEO. Tailwind CSS for styling. Framer Motion for animations.
Backend / CMS	Headless CMS (Sanity.io or Contentful) for admin content management. REST/GraphQL API.
Image Storage	Cloudinary (image optimisation, CDN delivery, WebP auto-conversion).
Payments	Stripe (Stripe Checkout or Elements). Webhook for payment confirmation.
Email	Resend or SendGrid for transactional emails (contact form, payment receipts).
Booking	Calendly embed (iframe or Calendly API for deeper integration).
Hosting	Vercel (Next.js optimised) or Netlify. Custom domain + SSL.
Analytics	Google Analytics 4 + Vercel Analytics. Privacy-compliant (cookie banner).
Auth (Admin)	NextAuth.js or Clerk for secure admin login. Single-user auth only (v1).
Forms	React Hook Form + Zod validation. Server-side validation on API route.
Accessibility	WCAG 2.1 AA compliance. Keyboard navigation. Screen reader tested.
Browser Support	Chrome, Firefox, Safari, Edge — last 2 major versions. iOS Safari + Android Chrome.

SECTION 10

Success Metrics & KPIs

Metric	Target	How Measured
Page Load Speed (LCP)	< 2.5 s	Google PageSpeed Insights / Core Web Vitals
AI Caption Generation	< 10 s	Round-trip API call for image description
Bounce Rate	< 55%	GA4 — measured after 30 days live
Mobile Usability	0 errors	Google Search Console mobile report
Contact Form Conversion	> 3% of visitors	GA4 goal tracking
Payment Conversion	> 1.5% of visitors	Stripe Dashboard + GA4
Lighthouse Score	> 90 all categories	Lighthouse CI on each deployment
Uptime	> 99.5%	UptimeRobot monitoring

SECTION 11

Out of Scope / Future Roadmap

The following features are explicitly excluded from v1 to maintain scope. They are planned for future versions after launch validation.

Version	Feature	Description
v2	Collaborator Accounts	Allow a second developer to upload work under their own login linked to the main portfolio.
v2	Blog / Dev Journal	CMS-driven blog: tutorials, game-dev tips, devlogs. Improves SEO over time.
v2	Advanced Booking System	Native booking calendar replacing Calendly embed. Custom availability, buffer times, rescheduling.
v2	Milestone Payment System	Split project payments into milestones. Client pays each milestone upon approval.
v3	Owner Analytics Dashboard	Built-in: visitor stats, most-viewed projects, traffic sources, conversion funnels.
v3	Multi-language Support	English + Yoruba / Igbo / Pidgin toggle for Nigerian audience.
v3	AI Project Descriptions	AI-assisted copy generation for project descriptions from bullet points.
v3	Testimonials & Reviews	Client testimonials collected post-project via email. Displayed on homepage and project pages.
